

# Genossenschaftliche FinanzGruppe

## Key Rating Drivers

**Leading German Retail, Commercial Group:** Genossenschaftliche FinanzGruppe's (GFG) ratings reflect the group's leading and highly diversified business profile, strong risk-adjusted capitalisation, low leverage, sound asset quality despite pressures, and record of stable profitability, as well as its outstanding funding profile by international standards. GFG's Viability Rating (VR) is one notch above the implied VR, reflecting the high importance of its strong business profile for the rating.

**Mutual Support Mechanism:** GFG is a cooperative banking network and not a legal entity. Its cohesion is ensured by an institutional protection scheme (IPS) managed by the Bundesverband der Deutschen Volksbanken und Raiffeisenbanken e.V. (BVR). GFG's Issuer Default Ratings (IDRs) are group ratings that apply to each member bank, including its central institution DZ BANK AG Deutsche Zentral-Genossenschaftsbank and its subsidiaries.

**Diversified Business Model:** A domestically focused, stable universal banking business model has delivered stable profits for GFG over several economic cycles. The model is based on local banks' strong domestic retail and small SME banking franchises, interlinked and supported by DZ BANK group's product providers. These include leaders in insurance, asset management and real estate, as well as DZ BANK's capital-market business. There is strong strategic alignment among DZ BANK and the local banks, with intensified cooperation and cross-selling across GFG.

**Conservative Risk Appetite:** GFG's risk profile largely reflects the group's cooperative nature, with a contained risk appetite. This is underpinned by granular credit exposures based on sound underwriting standards at primary banks, conservative securities portfolios, and the benefit of liquidity pooling and transmission through DZ BANK. However, local banks on average have notably higher interest-rate risk in their banking books.

**Moderate Asset-Quality Deterioration:** Asset quality remained resilient in 2024, despite a moderate rise in the volume of the non-performing loan portfolio. This mainly reflects Germany's weak economic performance and real-estate developer defaults in the housing sector. Fitch Ratings estimates a further moderate increase of the impaired loans ratio to around 2.5% in 2025, before an economic recovery is likely to stabilise GFG's loan quality.

**Resilient Underlying Profitability:** We expect GFG's earnings performance to have been resilient in 2024, with a solid contribution from DZ BANK, and an operating profit/risk-weighted assets (RWAs) ratio of around 1.5% (2023: 1.8%). The slightly lower expected 2024 result is mainly due to increased loan impairment charges and cost inflation. We expect profits to drop slightly again in 2025, but to remain above the group's long-term average.

**Strong Capitalisation:** The local banks and DZ BANK are both well capitalised, with strong buffers over their respective regulatory requirements. GFG's leverage ratio is high by international standards. We expect GFG's common equity Tier 1 (CET1) ratio to remain above 15% in the medium term, supported by high profit retention and slower loan growth than in previous years.

**Stable Funding, Strong Liquidity:** GFG's funding profile is stable and superior to most peers', reflecting the local banks' granular retail deposits and DZ BANK's deep market access and wholesale funding capacity, including covered bond issuance. GFG has strong liquidity underpinned by an effective pooling mechanism of local banks' excess savings at its central institution. We expect GFG to defend its leading deposit market share in 2025.

## Rating Sensitivities

### Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

We could downgrade the ratings of GFG and its members if GFG's impaired loans ratio rises above 3% on a sustained basis, its average operating profit declines to below 1% of RWAs, or its regulatory CET1 ratio falls durably below 13%. A downward revision of our operating environment score for GFG (aa-/stable) would also put pressure on its ratings.

### Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

A ratings upgrade of GFG and its members is unlikely given the already-high ratings. In addition to a domestic environment that would allow higher lending margins, an upgrade would also require greater cost efficiency, which is likely to necessitate further streamlining of the group's structure, especially at the local banks, beyond the current merger activity, as well as better asset quality and higher capitalisation.

Source: Fitch Ratings

The Short-Term IDRs of GFG and its members map to their Long-Term IDR of 'AA-'.

The long-term deposit ratings and long-term senior preferred debt ratings of DZ BANK and its banking subsidiaries, the long-term deposit rating of Muenchener Hypothekenbank, and DZ BANK's Derivative Counterparty Rating are one notch above their respective Long-Term IDRs because of the protection provided by resolution buffers to preferred creditors. In our view, resolution would only occur in the extremely unlikely event that GFG's mutual support scheme fails to protect group members' viability.

The deposit ratings of Deutsche Apotheker- und Aerztebank and of the local cooperative banks are aligned with GFG's IDRs due to the absence of sustainable significant resolution debt buffers at these entities. Each local bank is regulated individually as a less significant institution. Consequently, the German regulator's preferred resolution strategy for these banks consists of standard insolvency procedures, as opposed to the preferred bail-in resolution strategy for the DZ BANK group and Muenchener Hypothekenbank, each of which is directly under the authority of the European Single Resolution Board (SRB) and follows a single-point-of-entry approach. Therefore, the mainly deposit-funded local banks have no incentive to build up resolution buffers. This is also the case for Deutsche Apotheker- und Aerztebank, which is directly under the authority of the SRB but is not required to maintain resolution buffers in excess of its capital requirements.

The ratings of the subordinated Tier 2 and additional Tier 1 notes issued by DZ BANK and its subsidiaries are two and four notches below GFG's VR, respectively, which is the standard notching for these types of instruments under Fitch's criteria. We use the VR of GFG as the anchor rating as we believe that GFG, by protecting the viability of DZ BANK and its subsidiaries, increases the likelihood that all due payments on these notes will continue to be met.

The Key Rating Driver (KRD) weightings used to determine the implied VR are shown as percentages at the top. In cases where the implied VR is adjusted upwards or downwards to arrive at the VR, the KRD associated with the adjustment reason is highlighted in red. The shaded areas indicate the benchmark-implied scores for each KRD.

VR - Adjustments to Key Rating Drivers

The business profile score of 'aa-' is above the 'a' implied category score due to the following adjustment reason: business model (positive).

The earnings and profitability score of 'a' is above the 'bbb' implied category score due to the following adjustment reason: earnings stability (positive).

The capitalisation and leverage score of 'aa-' is above the 'a' implied category score due to the following adjustment reason: leverage and risk-weight calculation (positive).

The funding and liquidity score of 'aa' is above the 'a' implied category score due to the following adjustment reason: deposit structure (positive).

## Company Summary and Key Qualitative Factors

### Business Profile

#### *Decentralised Structure*

GFG is a large German financial network including banking, insurance and asset-management activities with an estimated total operating income of above EUR35 billion in 2024. GFG is one of Europe's largest cooperative banking groups. Its domestic market shares are close to 20% in most deposit and loan segments, second only to the savings banks (Sparkassen-Finanzgruppe (Sparkassen); SFG). GFG is particularly strong in retail and small business banking, where it has steadily increased its market shares in most core products over the past decade.

The network comprised around 670 local cooperative banks at end-2024. The banks have a nationwide retail and small SME banking franchise that is based on a deep knowledge of their respective local economic environments. Moreover, around 60% of the group's 30 million clients are also the local banks' owners. This relationship ensures strong loyalty among the client base and enhances the long-term stability of GFG's business model, underpinning its business profile.

GFG also includes the primary banks' central institution and commercial bank, DZ BANK, which consolidates various banking product providers, including mortgage lender DZ HYP, asset-management company Union Investment, and insurer R+V Insurance. DZ BANK accounts for around 40% of GFG's aggregated assets at end-2024.

DZ BANK offers a variety of wholesale and capital market products, including investment certificates and interest-rate hedging products. In its transaction business, DZ BANK also provides a trading and custody platform for cryptocurrencies, which is being rolled out in a pilot phase to a limited number of primary banks. This underpins the group's commitment to digital banking payment solutions and services.

GFG's local banks collectively own DZ BANK, control its supervisory board, and define its strategic operations in cooperation with DZ BANK's management. The ECB's formal direct supervision applies to the domestic systemically important DZ BANK group, Deutsche Apotheker- und Aerztebank and Muenchener Hypothekenbank. The Bundesbank and Federal Financial Supervisory Authority supervise each local bank. Each local bank must individually fulfil regulatory requirements, such as the Supervisory Review and Evaluation Process and liquidity coverage ratios, although the mutual support scheme and DZ BANK's central liquidity pooling ensure intragroup fungibility of capital and funding.

#### *Cohesion Underpins GFG's Business Profile*

The local banks operate more autonomously than in most European cooperative banking groups, but they share a close relationship with DZ BANK based on intensive cooperation and cross-selling opportunities. This strengthens GFG's cohesion, which we believe is very strong. Cohesion is also underpinned by the group's IPS, which has an impeccable record of protecting creditors and ensuring the viability of member institutions.

BVR's IPS had to support a small number of individual primary banks in 2024. We believe that these cases are not related and do not indicate structural deficiencies in the scheme's risk practice, although we expect further refinements to risk-surveillance processes. The cost to the IPS of the support measure was small relative to the capacity of the scheme.

### Risk Profile

#### *Conservative Risk Profile*

GFG's overall risk appetite is conservative and keeps the group's risk profile at reasonable levels, as demonstrated by a low impaired loans ratio through the cycle, both at the level of the primary banks and at DZ BANK group. The local banks' typically low risk appetite with close regional and customer proximity adequately mitigates GFG's credit risk, with mitigation also aided by the banks' diversified and granular exposures. A strong focus on owner-occupied housing loans, which account for over one-third of GFG's total loans, is a further important risk-mitigating factor.

We also consider DZ BANK's risk profile as adequate for a commercial bank of its size, despite some sector concentration risks and exposure to more vulnerable asset classes including commercial real estate (CRE). The group has only minimal exposure to the slowly recovering US office property sector. Both of GFG's CRE lenders (DZ HYP and Muenchener Hypothekenbank) remained profitable in 2024 without a need for materially higher loan impairment charges.

### ***Decentralised Risk Management with Adequate Risk Controls***

Each local bank defines its risk appetite independently, and underwriting decisions are not subject to GFG-wide centralised approvals or limits. However, BVR's monitoring system indirectly influences individual banks' risk-taking, because contributions to GFG's mutual support fund, BVR-Sicherungseinrichtung, are strictly risk-oriented, as they depend on BVR-Sicherungseinrichtung's assessment of each bank's risk profile.

### ***High Structural Interest Rate Risk in the Banking Books Is a Weakness***

The banking books of GFG's local banks are exposed to mostly unhedged structural interest-rate risk due to their asset/liability duration mismatches and high share of fixed-rate lending, and this is a rating weakness. We believe that primary banks need to focus on interest-rate risk in their banking books and to continue to reduce volatility under BVR's monitoring.

## Financial Profile

### Asset Quality

GFG's loan quality benefits from a strong focus on granular retail housing, small SMEs and professionals, high collateralisation levels in secured lending, and low single-name and sector concentrations. The group's asset quality deteriorated moderately in 2024, reflecting the recession in Germany, with a rising number of corporate insolvencies across various sectors of the economy, including SMEs and consumer finance. We expect impaired loans to rise moderately in 2025 before stabilising in 2026 on likely moderate economic recovery.

The impact from recent market stress in CRE has been moderate for the group. GFG's exposure to CRE is mostly concentrated at DZ BANK's subsidiary DZ HYP and at Muenchener Hypothekbank, two of Germany's larger CRE lenders with a combined loan volume of around EUR100 billion. Both lenders maintained a solid asset quality in their portfolios with impaired loan ratios below 2%. However, some local banks suffered from rising defaults of real estate development companies.

DZ BANK managed the overall asset quality in its corporate loan book well, with an impaired loans ratio of around 2% (end-2023: 1.7%), which is in line with German peers. This reflects DZ BANK group's conservative underwriting standards and good risk diversification. However, DZ BANK's asset-quality metrics were negatively affected by a larger individual default in the German agricultural sector, driving the slight increase of its impaired loans ratio.

### Operating Profit/Risk-Weighted Assets

Source: Fitch Ratings, Fitch Solutions, banks

### Earnings and Profitability

GFG, similar to the savings banks, has a stable earnings profile through the cycle. The very high diversification of its business model with strong contributions from insurance and asset management and a moderate risk profile have underpinned its longstanding reliable record of profitability.

We estimate that GFG's operating profit/RWAs ratio remained strong at 1.5% in 2024 (2023: 1.8%), supported by a solid operating performance of both the primary banks and DZ BANK group in a weak domestic economic environment. We forecast a further moderation of profitability in 2025 as interest rates are likely to decline and loan growth volumes to remain below their long-term level due to Germany's continued economic weakness. However, a steeper yield curve due to expected fiscal loosening of government policy is mitigating pressure on net interest income. Higher loan impairment charges and cost inflation are also likely to weigh on profitability in 2025.

Additionally, we expect the contribution of DZ BANK group to be lower in 2025, in line with management's profit guidance of EUR2.5 billion to EUR3.0 billion. However, we expect GFG's result to again exceed the group's long-term average, with an operating profit above EUR10 billion.

### Capitalisation and Leverage

GFG's capitalisation and leverage metrics are strong by international standards. Our assessment of the group's capitalisation considers local banks' use of the standardised approach to measure credit risk for all asset classes. We believe this approach considerably overstates the riskiness of GFG's balance sheet compared with similar European peers that mostly use the internal ratings-based approach. GFG's equity mainly consists of retained earnings accumulated during the group's long and steady record of strong organic capital generation, with a payout ratio typically below 10% of GFG's net income.

We estimate that GFG's CET1 ratio increased to above 16% at end-2024 as moderate loan growth at the local cooperative banks (2.6%) and profit retention further supported capital generation, despite rising RWAs. At DZ BANK, capital ratios also improved in 2024, with a preliminary CET1 ratio of 15.8%, a level the bank plans to exceed in 2025 based on its profit forecast. DZ BANK, unlike some German and European peers, will refrain from share buybacks to bolster its return on capital, which will support GFG's capital accumulation and loss-absorbing capacity.

**CET1 Ratio**

Source: Fitch Ratings, Fitch Solutions, banks

**Gross Loans/Customer Deposits**

Source: Fitch Ratings, Fitch Solutions, banks

**Funding and Liquidity**

GFG’s strong funding and liquidity profile reflect its robust franchise, operating in one of Europe’s largest deposit markets.

The local banks are mainly funded by granular retail deposits, which demonstrated above-average stickiness through various interest-rate cycles given a loyal customer base. GFG has a good ability to fend off aggressive competitors, as competition for cheap retail deposits in Germany is high. However, we expect less pressure on relocation of deposits as short-term rates have declined from their peak in 1H24. We also expect the notable shift towards time deposits to have ended on declining interest rates, which will increase low-cost sight deposit funding.

GFG meets most of its external wholesale funding needs with covered bonds. Its members (mainly its mortgage lenders DZ HYP and Muenchener Hypothekenbank) are collectively, and by a wide margin, the largest issuers of German covered bonds, with nominal EUR70 billion outstanding mortgage covered bonds at end-3Q24. A material share of this aggregated volume is placed within GFG.

DZ BANK pools the local banks’ excess deposits in its capacity as GFG’s central institution, and some of its subsidiaries (especially its housing lender Bausparkasse Schwaebisch Hall) are large deposit-takers. Therefore, its wholesale funding needs are limited relative to its size, even though it is a regular issuer of unsecured debt. DZ BANK places a significant share of its senior unsecured debt at GFG’s local banks. Most of its external unsecured issuance is small private placements, often as reverse enquiries, to a diversified pool of international investors. This limits the bank’s exposure to funding market volatility.

The local banks and DZ BANK have large liquidity portfolios, held in cash or invested in adequately diversified investment-grade bonds. In addition, local banks also run held-to-collect investment portfolios.

**Additional Notes on Charts**

The forecasts in the charts in this section reflect Fitch’s forward view on the bank’s core financial metrics per Fitch’s *Bank Rating Criteria*. They are based on a combination of Fitch’s macroeconomic forecasts, outlook at the sector level and company-specific considerations. As a result, Fitch’s forecasts may materially differ from the guidance provided by the rated entity to the market.

To the extent Fitch is aware of material non-public information with respect to future events, such as planned recapitalisations or merger and acquisition activity, Fitch will not reflect these non-public future events in its published forecasts. However, where relevant, such information is considered by Fitch as part of the rating process.

Black dashed lines represent indicative quantitative ranges and implied scores for Fitch’s core financial metrics for banks operating in the environments that Fitch scores in the ‘aa’ category.

The peer average includes Sparkassen-Finanzgruppe (Sparkassen) (VR: a+), Desjardins Group (aa-), Groupe BPCE (a), Credit Mutuel Alliance Federale (a+), Svenska Handelsbanken AB (aa), Skandinaviska Enskilda Banken AB (publ) (aa-), Cooperatieve Rabobank U.A. (a+). Unless otherwise stated, financial year end is 31 December for all banks in this report. Latest average uses FY24 data for Desjardins Group, Groupe BPCE, Svenska Handelsbanken AB, Skandinaviska Enskilda Banken AB (publ), Cooperatieve Rabobank U.A., 1H24 data for Credit Mutuel Alliance Federale, and end-2023 data for SFG.

Actual jurisdiction D-SIB GSR	ns
<b>Government Support Rating</b>	<b>ns</b>
<b>Government ability to support D-SIBs</b>	
Sovereign Rating	AAA/ Stable
Size of banking system	Negative
Structure of banking system	Neutral
Sovereign financial flexibility (for rating level)	Positive
<b>Government propensity to support D-SIBs</b>	
Resolution legislation	Negative
Support stance	Negative
<b>Government propensity to support bank</b>	
Systemic importance	Neutral
Liability structure	Neutral
Ownership	Neutral

The colours indicate the weighting of each KRD in the assessment.

■ Higher influence
 ■ Moderate influence
 ■ Lower influence

GFG's Government Support Rating of 'no support' (ns) reflects our view that although external extraordinary sovereign support is possible, it cannot be relied upon. The EU's Bank Recovery and Resolution Directive and the Single Resolution Mechanism for eurozone banks provide a framework for resolving banks that requires senior creditors participating in losses, if necessary, instead of, or ahead of, a bank receiving sovereign support.

Environmental, Social and Governance Considerations

**How to Read This Page**  
ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

**The Environmental (E), Social (S) and Governance (G) tables** break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

**The Credit-Relevant ESG Derivation table** shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Social (S)

General Issues	S Score	Sector-Specific Issues	Reference	S Scale
Human Rights, Community Relations, Access & Affordability	2	Services for underbanked and underserved communities; SME and community development programs; financial literacy programs	Business Profile (incl. Management & governance); Risk Profile	5
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Compliance risks including fair lending practices, mis-selling, repossession/foreclosure practices, consumer data protection (data security)	Operating Environment; Business Profile (incl. Management & governance); Risk Profile	4
Labor Relations & Practices	2	Impact of labor negotiations, including board/employee compensation and composition	Business Profile (incl. Management & governance)	3
Employee Wellbeing	1 n.a.	n.a.		2
Exposure to Social Impacts	2	Shift in social or consumer preferences as a result of an institution's social positions, or social and/or political disapproval of core banking practices	Business Profile (incl. Management & governance); Financial Profile	1

**Classification of ESG issues** has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board (SASB).

**Sector references** in the scale definitions below refer to Sector as displayed in the Sector Details box on page 1 of the navigator.

Governance (G)

General Issues	G Score	Sector-Specific Issues	Reference	G Scale
Management Strategy	3	Operational implementation of strategy	Business Profile (incl. Management & governance)	5
Governance Structure	3	Board independence and effectiveness; ownership concentration; protection of creditor/stakeholder rights; legal/compliance risks; business continuity; key person risk; related party transactions	Business Profile (incl. Management & governance); Earnings & Profitability; Capitalisation & Leverage	4
Group Structure	3	Organizational structure; appropriateness relative to business model; opacity; intra-group dynamics; ownership	Business Profile (incl. Management & governance)	3
Financial Transparency	3	Quality and frequency of financial reporting and auditing processes	Business Profile (incl. Management & governance)	2
				1

CREDIT-RELEVANT ESG SCALE

How relevant are E, S and G issues to the overall credit rating?

5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Irrelevant to the entity rating but relevant to the sector.
1	Irrelevant to the entity rating and irrelevant to the sector.

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit <https://www.fitchratings.com/topics/esg/products#esg-relevance-scores>.

## SOLICITATION & PARTICIPATION STATUS

For information on the solicitation status of the ratings included within this report, please refer to the solicitation status shown in the relevant entity's summary page of the Fitch Ratings website.

For information on the participation status in the rating process of an issuer listed in this report, please refer to the most recent rating action commentary for the relevant issuer, available on the Fitch Ratings website.

## DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
